This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. * In cases where blanks occur, the article was probably classified under some general heading and not particularly specified. † The value of dynamite imported during 1896 (£45,299) was accidentally omitted when making up the Return of Imports for 1896. The amount therefore is accounted for in the total Imports for 1897. ‡ £42,000 out of this amount was, through a clerical error, omitted from the total amount of Imports for 1896, and therefore is accounted for in the total Imports for 1897. § Through a clerical error, £7,080 of this amount was omitted from the total amount of Imports for 1895, and is therefore accounted for in the total Imports for 1896.

* Included under heading "Orchards and Gardens."

** The apparent falling off in 1896-97, as regards the heading "Orchards and Gardens," is explained by the fact that the acreages now separately specified under "Onions," "Other Root Crops," "Market Gardens," etc., were in previous years all included under the one heading.

† *The acreages under "Vines" and "Fruit Trees" in 1896-97 and 1897-98 have been compiled on the basis of the actual number of vines and fruit trees planted according to a standard supplied by the Department of Agriculture, which allows 600 vines or 100 fruit trees to the acre; a comparison between the figures of these years and those of previous years is, therefore, valueless.*

‡ "The Total Area under Crop" in 1896-97 was 111,738¼ acres, and if there be added to this 4,043½ acres under *permanent artificially sown grasses*, 24,945¼ acres *cleared and prepared for immediate use*, and 22,561¼ acres of land in *fallow*, the area of *arable land* at the end of the season will show a total of 163,288¼ acres.

§ "The Total Area under Crop" in 1897 was 133,182¾ acres, and if there be added to this 3,316⅝ acres under *permanent artificially sown grasses*, 35,424¼ acres *cleared and prepared for immediate use*, 39,898 acres of land in *fallow*, and 58,703½ acres of *cleared land, previously cropped, now used for grazing or not used*, the area of *arable land* at the end of the season will show a total of 270,525⅛ acres; an increase on the previous year's figures of 107,236⅞ acres, or 65·67 per cent.

* Included under heading "Orchards and Gardens."

** The apparent falling off in 1896-97, as regards the heading "Orchards and Gardens," is explained by the fact that the acreages now separately specified under "Onions," "Other Root Crops," "Market Gardens," etc., were in previous years all included under the one heading.

† *The acreages under "Vines" and "Fruit Trees" in 1896-97 and 1897-98 have been compiled on the basis of the actual number of vines and fruit trees planted according to a standard supplied by the Department of Agriculture, which allows 600 vines or 100 fruit trees to the acre; a comparison between the figures of these years and those of previous years is, therefore, valueless.*

‡ "The Total Area under Crop" in 1896-97 was 111,738¼ acres, and if there be added to this 4,043½ acres under *permanent artificially sown grasses*, 24,945¼ acres *cleared and prepared for immediate use*, and 22,561¼ acres of land in *fallow*, the area of *arable land* at the end of the season will show a total of 163,288¼ acres.

§ "The Total Area under Crop" in 1897 was 133,182¾ acres, and if there be added to this 3,316⅝ acres under *permanent artificially sown grasses*, 35,424¼ acres *cleared and prepared for immediate use*, 39,898 acres of land in *fallow*, and 58,703½ acres of *cleared land, previously cropped, now used for grazing or not used*, the area of *arable land* at the end of the season will show a total of 270,525⅛ acres; an increase on the previous year's figures of 107,236⅞ acres, or 65·67 per cent.

* *The acreages under "Vines" and "Fruit Trees" have been compiled on the basis of the actual number of vines and fruit trees planted according to a standard supplied by the Department of Agriculture, which allows 600 vines or 100 fruit trees to the acre.*

† *For specification of areas under various kinds of fruit trees see next table.*

No. 16.—*Specification of Acreages under Fruit Trees in 1897-8.* *

NOTE.—This table has been compiled with the special object of showing the value of such products of the Soil and of Live Stock imported into Western Australia during the last 10 years as could have been produced within the Colony, and to serve as a basis for calculations as to the market reasonably to be expected therein for home-grown products.

No. 30.—*Green Fruit imported into Western Australia during 1897.*

INDUSTRIAL ESTABLISHMENTS (EXCLUSIVE OF MINES).

For details of Mining Statistics see Part VII. of the Statistical Register.

The Statistics relative to *Industrial Establishments* for the year 1897 have been compiled from Returns supplied by such Establishments only which come under the operation of "The Industrial Statistics Act, 1897" (61 Vict., No. 26).

An "Industrial Establishment," according to the Interpretation Clause, means "any factory, workshop, or mill where either four persons or more have been employed at any time during the year, or where an engine driven by steam, gas, or electricity has been used, whatever be the number of persons employed, and any mine which has been worked at any time during the year, whatever be the number of persons employed."

In the Returns for 1896 an Establishment where no engine was used was taken into account if at least *five* persons were employed, but the minimum number has, by the Act above referred to, been reduced to *four*.

The number of men employed at mines or upon prospecting work during 1897 was 17,903, the greater number of whom were not actually engaged below ground. The proportion of fatal accidents per 1,000 miners thus employed is 1·68. Comparing the death-rate from accidents with the total quantity of gold exported, 30 persons were killed for a production of 674,994 ounces of gold, a proportion of 22,500 ounces per life lost.
